Reach Your Milestones as Fast as Possible

Chapter Two from Flow Centre

Music and Trading

Seven Steps to Creating Funds

1. Decide what is holding you back and deal with it.

2. Understand what money is.

3. Create a plan for wealth.

4. Decide what you desire to attract into your Flow Centre and why you want it. 5.

Understand financial concepts and the skills to create money.

6. Work with an ideal supportive team.

7. Take 'massive' consistent wealth action.

Reach Your Milestones as Fast as Possible

Intention in Motion Milestones

How to Make a Million. The investment levels we are looking for are... A minimum of \$7500 for our CFD Managed Forex Account A minimum of £50,000 on the other Managed Forex Account.

Based on the principle of compounding your money monthly, look at the following 4 examples below which are based on only 3%

growth a month, how much better can you achieve at a higher investment level?

Bearing in mind, one of the Managed Forex Accounts has averaged 7% a month for the last 6 years. The CFD account has performed over 24% a month for the between September 2016 to June 2017.

Given the choice between £1 million today or a penny today and double the value every day

Reach Your Milestones as Fast as Possible

for twenty-eight days,” which would you take? After just 28 days you have gained 134217728 pennies, or £1,342,177.28 that’s £1.34 million!

That is the power of compounding. If you start with £2,000 and compound it for 15 years at let's say 3% per month adding £200 each month that will be 36% on the new balance each year.

Let me give you four examples:

If you were to initially invest £1000 putting in £200 a month at 3% per month, let's assume at a target of £36% per year. After 15 years of compounding at 36% per year you will have £1,709,085.39.

If you were to initially invest £2000 putting in £200 a month at 3% per month, let's assume at a target of £36% per year. After 15 years of

Reach Your Milestones as Fast as Possible

compounding at 36% per year you will have £1,929,903.37.

If you were to go for it and initially invest £5000 putting in £200 a month at 3% per month, let's assume at a target of 36% per year . After 15 years of compounding at 36% per year you will have £2,592,357.31.

If you were to really go for it and initially invest £10,000 putting in £500 a month at 3% per month, let's assume at a target of

36% per year. After 15 years of compounding at 36% per year you will have £5,928,848.32 and that is by adding only £6000 a year.

Ok, using a journey from London to Edinburgh as a metaphor to explain how to get from a desired state to the accomplishment of let's say a goal of having £1 million cash. I decided to use the metaphor

Reach Your Milestones as Fast as Possible

to build a model upon for Intention in
Motion Milestones.

So how does it work... London to Edinburgh
414 miles or 665 Kilometers, let's use miles
and pounds for the purpose of this exercise.
We know that the USD is the reserve
currency but, £1 is worth more than one of
any other currency in the world.

Let's assume we take a route where the
distance to Edinburgh Castle from
Buckingham Palace is 500 miles. Investing
£200 five thousand times will get you
£1,000,000.

London Buckingham Palace represents a
desired state; let's say to have one million in
the bank. Arrival in Edinburgh represents
having £1,000,000.

Reach Your Milestones as Fast as Possible

What is the half-way point between London and Edinburgh, the answer is say Manchester about 208 miles from London. So Manchester is the point at which you will have £500,000 in the bank already...nice going!

What is the half-way point between London and Manchester, about the Leicester area 101 miles from London? Your arrival in Leicester you will have £250,000 in the bank.

What is the half-way point between London and Leicester, about the Milton Keynes area 54 miles from London? Your arrival at Milton Keynes you will have £125,000 in the bank.

What is the half-way point between London and Milton Keynes, about the Harpenden area 31 miles from London? Your arrival at Harpenden you will have £62,500 in the bank.

Reach Your Milestones as Fast as Possible

What is the half-way point between London and Harpenden, about the Borehamwood area 14 miles from London? Your arrival at Harpenden you will have £31,250 in the bank.

What is the half-way point between London and Borehamwood, about the Brent Cross area 7 miles from Buckingham Palace.

Your arrival at Brent Cross you will have £15,625 in the bank.

What is the half-way point between Central London and Brent Cross, about the West Hampstead area 3.5 miles from Buckingham Palace? Your arrival at West Hampstead you will have £7810 in the bank.

Reach Your Milestones as Fast as Possible

What is the half-way point between Central London and West Hampstead, about the Baker Street area 2 miles from Buckingham Palace? Your arrival at Baker Street you will have £3905 in the bank.

What is the half-way point between Buckingham Palace and Baker Street, about the Park Lane area 1.5 miles from

Buckingham Palace? Your arrival at park Lane you will have £1952 in the bank.

What is the half-way point between Buckingham Palace and Park Lane, you will be on Constitutional Hill on the doorstep of Buckingham Palace. Your arrival at Constitutional Hill you will have £967 in the bank.

Reach Your Milestones as Fast as Possible

So you start at Buckingham palace with less than £500. I think we all agree that having £500 in the bank is a lot easier than having £1,000,000.

So now we are starting to talk about 150 to 180 inputs instead of 5000. Think about what you could achieve if you were you max out on your earning potential and invest all your earnings. You'd be there in no time at all.

Raphael Goes to Music and Trading

It's a warm Sunday afternoon and Raphael is at home in Belsize Park in front of his computer browsing through his Facebook time-line and stumbles upon an ad 'Free Music and Trading Event' Give your intention wings!

Reach Your Milestones as Fast as Possible

Looks interesting he thought to himself
clicking through to a website offering a free
ticket in exchange for his name and email.

The Music and Trading event is scheduled at
7.30pm on Thursday evening at Lauderdale
House in Highgate, London.

Printing off the ticket with an air of
expectancy and wonders could this be the

thing I'm looking for, before watching
Sunday football on Sky Sports.

On Thursday evening Raphael takes the short
walk across the heath to Lauderdale House.

Located in the lush greenery of Waterlow
Park the house is a fine looking English
heritage building in a majestic white.

Reach Your Milestones as Fast as Possible

The event is to take place on the ground level.

Arriving there at 7.15 he is greeted warmly with a glass of prosecco. There are about 50 other attendees all networking contentedly with an air of expectancy and curiosity also drinking prosecco.

Noticing most are women between the ages of 28-50, professional looking, with many of them looking as if they have come directly

from work. There is a mixed feeling in the room. Some are positive towards what may lie in store for them, mixed with a touch of scepticism from others.

“Can you kindly take your seats” asks the helper for the evening, “you can bring your glass of prosecco with you.”

Reach Your Milestones as Fast as Possible

At 7.30 David walks to the centre of the performance area and begins the solo clarinet part of the event. He performs a programme of some shortish classical pieces and a few well and lesser known pieces from the jazz repertoire.

The audience seem to be taken by surprise by the level of musicianship David has, and it is

very well appreciated as they listen attentively enjoying the programme.

Raphael wonders to himself, why does such a good musician work in personal growth, if I could play an instrument as well as him I would do nothing else.

As the music goes on there is a growing sense of ease in the room. It brings a sense of unity

Reach Your Milestones as Fast as Possible

and relief as even the sceptics have moved towards the positive side of the polarity bar.

Playing a well chosen programme, moving from the melodious warm and sultry to the quick fingered technically challenging to stun and amaze. With highs and lows, intensity and release, from lows and the very softly gentle. The audience moving excitingly through a range of emotions that set the tone of the scene for what lies ahead.

After twenty minutes of gorgeous playing the room explodes with applause, David acknowledges the appreciation and places the clarinet on a stand. "Thank you for coming" he incites, "I always like to start a presentation in this manner when the opportunity presents itself.

Music is a language that everybody understands all over the world, as it calms people down after perhaps a long day at

Reach Your Milestones as Fast as Possible

work, enlivening the mind. Has anyone here been to a music and trading event before?"

Looking around the room and his helper raises her hand, as he gives her a knowing smile.

"So you're in for a treat, are you sitting comfortably?"

There are some nods among the audience.

"Are you looking for more?"

Can you tell me what is the one thing you most desire to see in your world?

Let me tell you a little about myself. I'm David of The Wellness Clarinet Ltd and Wellklar Records.

From London and have toured the world as a clarinettist and saxophonist with 11 albums as a leader. A Peak Performance Strategist with innovations in the Personal Development arena.

Reach Your Milestones as Fast as Possible

Innovations being Flow Centre, Music and Trading and Intention in Motion Milestones.

Books include Flow Centre, Finding Balance, Music and Memory and A Harmony and Scales System for Clarinet, Saxophone and Flute.

For me things have not always been easy, music has always treated me fine but often money was a struggle. Being a touring musician is fun with many highs in money

and peak experiences, but it is the gaps in between these highs the struggle awaits.

This is a challenge for many a musician, how to sustain the peak experiences while bringing in enough money to pay the bills. I have known times having to crash on a friends floor having been evicted from my apartment through inability to pay the rent.

Reach Your Milestones as Fast as Possible

I have been stranded in foreign lands without food or enough money to buy a ticket back home. I have had to pawn musical instruments, the very tools of my trade to buy food, and had to battle to find the money to get them back with interest. I've had to borrow money off friends and family to get out of shit situations.

I've lived off the love of women in my life happy to pay my way; not something I would

recommend to any man because if you don't truly mean it with her, she will be as hurt as a Gazelle caught in the lair of a Cheetah. So I know it how things can be.

Cracking on with my intent and goals, enlisting the help of mentors and experts who helped me craft a journey to create a good way.

Today I can truly say I have all the opportunity for my hearts desire, and I'm the

Reach Your Milestones as Fast as Possible

proud owner of The Wellness Clarinet and Wellklar Records, fulfilling my own potential possessing the tools and strategies for others to do the same.

You are here because you have heard about the excellent opportunities we have on offer.

Our consulting opportunity 'Intention in Motion Milestones', so you can reach your milestones. And because you've probably heard about the software we are using to

trade foreign exchange that generates fantastic results.

You are looking for solution. Most of you have probably tried been to all the events, seminars, money making ventures and have bought into all the success creation gurus out there; to no avail.

I understand how you feel.

Reach Your Milestones as Fast as Possible

Some of you have even invested in tricksters and lost a life's saving investing in a scam.

My very own aunt in Miami did this. She invested in a fraudster named Anthony Blissett (ABFI INVESTMENT), who claimed 30% annual tax free growth, with assets of over \$36,000,00.

Prior to her misfortune with Blissett, my aunt led a successful life having accumulated a lot of wealth working in Saudi Arabia.

So, we all know these people exist, and I know just how skeptical and anxious some people are about the stock market. Anxiety is not a good thing.

Luckily, you have made the decision to be here this evening, and this is good.

Fortunately you have given me the opportunity to show you something real.

Reach Your Milestones as Fast as Possible

Allow me to show you an opportunity with a solid track record that can be verified and is profitable.

A strong track performance always gets a good response, and a strong track record always builds trust.

I know you can reach your milestones, as I know you can live the values that are important to you in life.

Trading high growth stocks and tested foreign exchange strategies as a vehicle to reach your milestones so you can do it.

I'm wondering how fast you will reach your first milestone.

Would you like to know more?

I'm curious to know what makes sense to you.

Over 200% CAGR should make you a little more curious.

Reach Your Milestones as Fast as Possible

Our Challenges

Only 5% of people really achieve highly in life, so what holds most of us back?

Practical assumptions such as lack of time availability, poor organization of time and laziness. Also the environment people operate within restricts their success. It can be said that the environment you live in has greater

power over you than your will. I personally have found this to be very true.

Emotional constraints such as lack of confidence, negativity from other people, fear of change, impatience, lack of motivation, stress, inactivity and greed.

The highest price we pay is inactivity, as it is true that laziness is more important to the lazy person than the ones they love; as if the

Reach Your Milestones as Fast as Possible

ones they love were more important, the lazy person would put out for them.

Lack of focus, potential causes of lack of focus is having no fun doing the things you need to do. Overwhelm, not knowing where to start. Fear of moving on.

Open your emotional spectrum. Dr Jane Cox on an event in London said, "Love with all you heart, always and open your emotional

spectrum, happiness cannot exist in the absence of hurt."

What she means is this, let's say you have opening your heart to me completely on one side of the spectrum and pain and hurt on the other. "Maybe he'll leave me, no I'm the strong one here I'll do it first to him."

So people reduce the possibility of being hurt, and at the same time the fear of being hurt

Reach Your Milestones as Fast as Possible

first so you close down a little bit. Taking away a little of the happiness on the swing at the opposite side too.

Next, well maybe he doesn't spend enough on me so I will do the same too, again the possibility of hurt decreases and so does the happiness on the other end.

Then well maybe he will look at another woman so I will protect myself from that, so

you protect yourself from the possibility of hurt and take away from the happiness too.

She explains that this is what people do consistently until they have phased out huge portions of their emotional spectrum and their possibility to be happy, protecting themselves from hurt, living in a tiny emotional spectrum until they are no longer happy.

Reach Your Milestones as Fast as Possible

When Jane said this I understood many things in relation to what many people do. People protect themselves so much from being hurt that they can only be happy on a superficial level for a short time, until they open their emotional spectrum and embrace their truth and true love.

Time v Income Reality Check

How much income do you earn per hour of work?

How many hours do you work on business that are currently non-income producing?

Where do you have time-leaks?

What impact are they having on your life?

Reach Your Milestones as Fast as Possible

Can you leverage the time that you work?

Open to Change Check

What would your ideal scenario be?

What hours would you like to work?

What income would you like to produce?

Do you prefer one good income stream with potential for growth, or do you prefer a few different income streams?

How closely does your current income stream, hours of work, and type of work correlate to this ideal?

What we do is walk hand in hand with you as you navigate from where you are now to where you desire to get to with passion, warmth, focus and adventure.

Intention in Motion Milestones is my personal growth and problem solving

Reach Your Milestones as Fast as Possible

innovation to catapult your burning intention into motion... Tearing apart your blocks, exploring and amplifying the emotions behind your success.

There are 5 pillars of wealth, owning a good business, having a good career, property investment, an internet business and the stock market. All 5 pillars can make you a success in your chosen area of endeavor. We

choose music and the stock market as our chosen vehicles for success.

The stock market can be looked upon as a gigantic vault full of money, with many different key combinations to access the vault. Keys can be Forex, stocks, options, moving averages, binary options and many others. We interest ourselves with Forex trading and Stocks.

Reach Your Milestones as Fast as Possible

What Is Forex Trading?

Forex or FX is short for foreign exchange,

Forex trading is about trading pairs of different currencies of countries. You simply exchange one nation's currency for another in the process of making money when the exchange rates change.

The rates are constantly fluctuating and are driven by supply and demand, interest rates, and fundamentals.

Fundamental analysis is the study of how economic news and events move the markets. Statistical data release such as money supply, interest rates, inflation, GDP, unemployment rate, trade balance, current account, consumer confidence and sentiment.

Reach Your Milestones as Fast as Possible

Numerous currency pairs are traded and there are 4 majors, the Euro/USD, GBP/USD, USD/JPY, USD/CHF, these are currency pairs where most money is traded.

Here money is made by what is known as spread-betting, the ability to make money simply by betting in which direction the various currency pairs will move in.

Automated Foreign Exchange Trading. The following currencies are traded by the software on behalf of its customers:

USD - US dollar

EUR - Euro

CHF - Swiss franc

GBP - British pound sterling

Reach Your Milestones as Fast as Possible

I find this level of success so intriguing. With a performance like this I know you can reach your milestones.

Money can be made when the market goes up or in a bull market, when it goes down known as a bear market, or even when it goes sideways, an innovation of Marcus de Maria known as a Buffalo market when the call of the Buffalo pushes the market along sideways.

It is a leveraged product meaning that the money other than the money the trader themselves risks on each trade is leveraged.

For now all profits are tax free and there are no commissions to be paid out on your winnings, they are all yours.

Forex traders increase their funds or account size through entering trades, when the criteria for entering a trade for the particular strategy they are using align.

Reach Your Milestones as Fast as Possible

Many countries on mainland Europe like Holland and Germany work with CFDs or contracts for difference. Whether trading in the UK or on the continent traders have to calculate their trade risk and trade size before creating a buy order.

The golden rule to apply is never to risk more than 1% of your account size in any trade, and always use stop losses.

There are 4 main strategies I learned, ones that when applied consistently will yield around 7 successful trades out of 10.

The News Sniper, trading on fundamentals from the news, an intra-day strategy based on using 5 minute candles and looks for small movements in the market.

The Sling Shot Pro strategy, a strategy based on using a 4 hour time frame or 4 hour candles. Here again we look for various

Reach Your Milestones as Fast as Possible

criteria and indicators to match up, such as the swing high to swing low, the Fibonacci retracement and other measures.

The Trend Rider strategy, based on 1 day candles. This strategy is good for people who don't have much time to trade, and trades can be easily managed in as little time as 20 minutes at the end of the day.

Also the Smart Money strategy, this is based on following the movements of the big game players in the market. When the large banks and monetary organisations enter the market the Smart Money strategy traders do. When the big players exit the market the Smart Money strategy users do.

Other than fundamental analysis the other main type of stock market analysis is Technical analysis. This uses information

Reach Your Milestones as Fast as Possible

from charts and other mathematical indicators to determine when trends are forming. A trend is simply a tendency for the price to keep moving in one direction or the other.

Why Trade Stocks...

A trend is simply a tendency for the purchase of stocks on a platform like Google Finance or Yahoo Finance from a company whether it is

a Blue Chip company like Apple or Microsoft, or another, you actually own that stock until the climate is right to sell.

Like Forex it is a buying and selling business and imperative to stick to the rules of a successful strategy. You can make money when the stock price goes up or when it goes down, as well as getting paid regular dividends when holding onto the stock.

Reach Your Milestones as Fast as Possible

Unlike property you can buy and sell on a whim when the various signals indicate so.

Stocks or Forex trading is a matter of preference. Forex is much more hands on, as opposed to stocks where you can buy and hold getting rich from dividends, sometimes for years and years.

The 'Dividend Yield' is a financial ratio that indicates how much a company pays out in dividends each year relative to its share price.

Dividend yield is represented as a percentage and can be calculated by dividing the dollar value of dividends paid in a given year per share of stock held by the dollar value of one share of stock.

The formula for calculating dividend yield may be represented as follows: annual dividends per share/price per share.

Reach Your Milestones as Fast as Possible

Yields for a current year are often estimated using the previous year's dividend yield or by taking the latest quarterly yield, multiplying by 4 and dividing by the current share price.

In other words they are paid quarterly.

When creating an order, 5% of the time use a limit order, the rest of the time use a stop order.

What is the personality of a stock?

1. How the stock moved off support and resistance.
2. Length of tail, how big the day was.
3. What does it do around earning, does it gap. Has the stock hit the line of support three times and the line of resistance three times.
4. What are the length of days lowest to highest.

Reach Your Milestones as Fast as Possible

5. Is it trending, has it changed its trend over the last year?

6. Has it given you good entry points in the past, if so you might want to use a limit order instead of a stop order.

7. What is the range of the stock? The range being the difference between the lines of support and resistance.

Twenty Reasons why the Stock

Market earns you money like

nothing else:

1. You are a free agent and can work at your own time and in your own way without peer pressure or a boss.

2. Anyone can do it.

Reach Your Milestones as Fast as Possible

Regardless of class, race, gender, you too can trade the stock market.

3. All you need is some money to invest, and that need not be a lot. If not learn to trade on a simulator, so you can practice until you are confident enough to trade live.

4. It has total time flexibility, work with a strategy to suite your lifestyle. Trading stocks require very little time input indeed. You can

work with a Forex strategy requiring as little as twenty minutes of your time per day.

5. You can work from a beach hut in the Caribbean, from the comfort of your own bedroom, work where you choose. All you need is a stable internet connection and a laptop.

6. It requires minimal training

Reach Your Milestones as Fast as Possible

It's not rocket science. Learn the basics quickly and easily.

7. It will always be there. As long as us humans buy and sell as part of our existence, so will the stock market.

8. Competition is not an issue.

In fact more buyers and sellers means bigger moves in the price, meaning more opportunities to make money.

9. You can beat a recession.

You can make money when the price goes up down or sideways.

10. There is no stock purchase necessary.

11. Incredibly low overheads. Only your internet connection, brokerage fees, and perhaps charting software. That's it!

12. No need to borrow money.

Reach Your Milestones as Fast as Possible

13. No meetings to attend to.

14. No manual work to do.

15. You are always in control. You can enter a trade or exit in seconds.

16. You can earn huge profits, when the market moves in your favour.

17. It's passive income. Earn as you sleep.

18. It's easy for kids to learn.

19. A great tool to build an abundance mentality.

20. The more you practice the better you get.

Be the law of attraction!!!

“Someone is sitting in the shade today because someone planted a tree a long time ago” (Warren Buffett)

calculate: Everything you own, Everything you owe, Your Net Worth is vital!

Your Net Worth Calculation

Work on it enough and you'll reach your

Ok, so where are you right now? What is your net worth?

CNW or Critical Net Worth, meaning you'll be financial FREE and will no longer need to work.

Reach Your Milestones as Fast as Possible

Reach your Critical Net Worth as fast as possible!

The result of re-investing your profits like this is called 'compounding' your money.

So how do you reach your CNW in the shortest possible time? The answer is by learning to make your money work hard for you, in other words, to invest your money, get some gains and then to reinvest those gains immediately so that your money is always working harder each time.

The greatest financial minds over the centuries have marveled at the power of doing something so simple.

It's been called, "the royal road to riches," "the greatest mathematical discovery in human history", "the most powerful force in the universe."

Reach Your Milestones as Fast as Possible

...Most famously by Einstein, “the eighth wonder of the world”.

You don’t have to be Einstein, simply having to resist the urge to spend your profits and instead re-invest your profits, if possible all of them, for maximum results.

4 Ways to Accelerate Your Journey to Financial Freedom

1. Increase your income
2. Save more
3. Invest more
4. Compound it so to increase your rate of return.

Reach Your Milestones as Fast as Possible

Do you have an intention you desire to achieve?

Can you project yourself into the future to a place and time having made this intention come true?

What is the essence of it?

What are you doing?

Do you like the idea of continuous Passive Income?

Where do you operate and who with?

Are you getting the highest possible returns from your investments right now?

Are you feeling relieved and content?

How would you feel having achieved it?

How good do you feel now?

Reach Your Milestones as Fast as Possible

Where in your *body* do you experience this feeling?

Turn up the volume as if you are hearing your new life in real time. Make the image of this success in your mind's eye life-size and panoramic.

See the colours associated with your intention bold and rich in detail. Is there anything else that triggers strong feelings?

6 Steps to Achieving Your Desire

(collated by millionaires and billionaires)

- A. EXACTLY how much money you want. B. EXACT date you intend to have it.
- C. EXACTLY what Passion and Creative Value you intend to give in exchange of the money you desire.
- D. CREATE a plan to follow.

Reach Your Milestones as Fast as Possible

E. WRITE everything down in a clear statement.

F. READ your statement out aloud.

(b) Write down at least 3 reasons you habitually use that prevents you from taking action NOW.

Step Two- Make a Decision

7 Steps to Success

Step one- Get Disturbed (a) Identify your story

(a) What intention do I desire to attract to my Flow Centre.

(b) Why is this important for me?

(c) Schedule WHEN this is to happen.

Step Three – Plan It

Reach Your Milestones as Fast as Possible

(a) Chunk down goal into smaller milestones.

as I start, even if I start small I will finish

(b) What needs to be done today.

where I desire to.

(c) Make it uncomfortable to back out.

If I focus on it, it will be a success for me.

Step Four – Adjust Your Thinking

Step Five – Set up the game to win

Past: I don't have enough time. I don't have

(a) What can be done to add value

enough money. I don't think I can be

(b) Start rewarding yourself for your

successful. Now: Time is equal for all of us, if I

approximate behaviour.

prioritize this it will happen for me. As long

Step Six – Seek out a successful strategy

Reach Your Milestones as Fast as Possible

(a) Test the strategy in the real world

(c) What strategy feels right for you?

(b) Use successful strategies every day, rinse and repeat.

(d) Which one is my key strategy?

Step Seven – Spend time with people doing it

(e) What was it that made you say 'I'm going to do this'...

(a) If you want to be a successful trader, spend time with successful traders.

Music and trading events provide an ideal opportunity to create value for people through touring the world, creating events and presenting at events of other entrepreneurs where people who are

(b) Most people's lives are a direct result of their expectations.

as our solution for your Financial Growth.

So you can watch how fast your capital will grow when traded by our partner traders.

Reach Your Milestones as Fast as Possible

We aim for 10% per month, the traders have achieved an average of 7% per month for the last 6 years. Now that is what you call a track record. You will have complete control of your money although the minimum investment in 50k, preferably 100k.

We also have an Automated Foreign Exchange Trading solution that is a stellar performer having achieved over 200% since

September 16th up to this day in January 2017. requiring a much lower minimum investment of \$7,500

Open an Automated Foreign Exchange Trading Account with us.

Currently The Bank of England with due respect for them will offer you 0.5% on your money a year.

Reach Your Milestones as Fast as Possible

Let's take a hypothetical investment level of

£10,000 with The Bank of England: 0.5% of

£10,000 is £50, your new balance would be

£10,050

Now let's take the same £10,000 based on the

84% growth that our traders have achieved

in 2016 and for the last 6 years. £18,400

would be your new balance at the end of year

one Funds are traded under a Percentage

Asset Management Model (PAMM) account.

This allows the software to execute one trade

in the market place and be able to allocate

that trade across all open and funded

accounts based on the relative size of each

account.

The relative size of the underlying customer

account will determine its share of the and

subsequently the share of the profit or loss.

The larger the relative sizes of one account to

Reach Your Milestones as Fast as Possible

the other customer accounts, then the larger the exposure to that trade.

Trading FX does involve the use of leverage and this can be determined by market conditions. The system places stop loss orders on all trades to manage the risk exposure of all trades

1. Consider this opportunity and the risk involved

2. On a scale of 1-10 considering how much good can come out of this opportunity for you. In the likely event that the trading techniques being used continues to create exceptional profit.
3. On a scale of 1-10 how much of a negative effect the risk of this not working have on you and your business.

Reach Your Milestones as Fast as Possible

4. If the first number is bigger than the second, the risk/reward ratio is weighed towards action. If the second number is bigger than the first, it is probably better to find another way to proceed!

2. Move forward with Intention In Motion Milestones Consultancy.

Take 10 session of consultancy to reach your burning intention. Whether you simply want your money to work for you or to develop a personal or business idea we have the solution.

CAGR...Minimum: 50% Target: 84%
